Version 1.4 - October 09

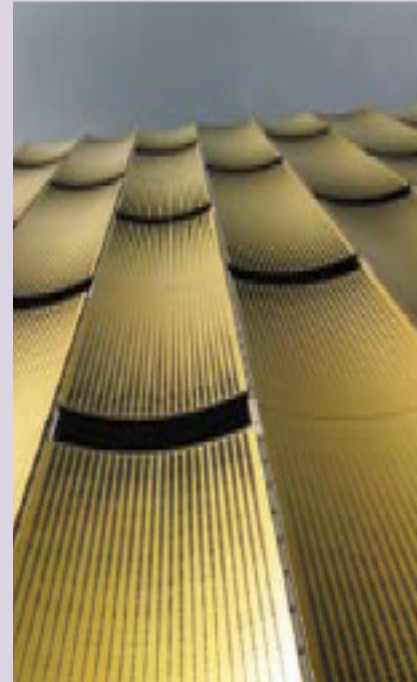

Color - Creativity - Design

Natural Elegance...

Fabral supplies innovative surfaces, wall and roof panels in pre-coated aluminum. AluNatur is one of these special finishes, and it highlights the natural beauty of the aluminum. An almost unlimited range of (semi) transparent clearcoats applied on Brushed or Transparent Lacquering surfaces creates a unique and unrivalled natural color palette...

- Project: De Cope (parking and offices)
- Location: Urecht - The Netherlands
- Architect: JHK architecten
- Product: AluNatur HDP
- Design: Gold TL (Transparent Lacquering)
- Effect: Look of transparent gold

High abstraction level

De Cope is a multifunctional building which houses a parking garage and offices. The intention was to integrate these two in an abstract and high volume. The combination of concrete elements and elevated / perforated AluNatur Gold sheets perfectly contributes to this abstract design idea in which raw materials play an important role.
