

# CLIMAGUARD™

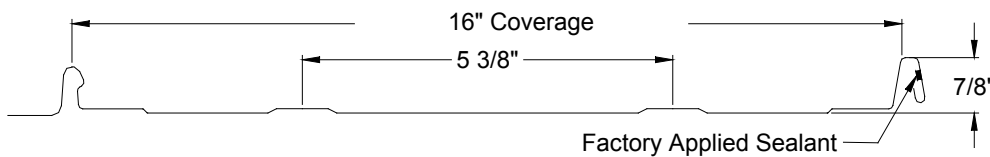

## Climaguard makes residential and light commercial roofing a snap.

Climaguard's smart design and popular colors add style and beauty to any building. Because Climaguard is made of 26 gauge steel, the beauty is more than skin deep. Metal roofing is made to withstand the elements; it is weather, wind, fire, insect and hail resistant and will protect your investment for years to come.

Snap together panels and pre-punched fastener slots make installation quick and easy. In many cases, Climaguard can be installed over an existing roof saving time and money.

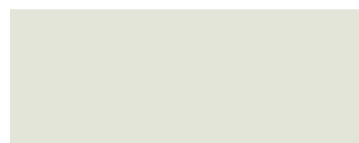

For great looks, maximum performance and installation that's a snap, choose Climaguard. Quite possibly, it's the last roof you will ever need.

- Stiffening ribs for added strength
- Factory applied sealant is standard for optimum weather tightness
- Light weight, energy efficient and fire resistant
- Easy to install-can be installed over solid decking or over an existing roof
- Fade-resistant paint system with a lifetime finish warranty for years of low maintenance beauty
- Custom cut to lengths, min. 2ft; suggested max length, 35ft

Brick Red 898 • IR = .30

White 899 • IR = .56

Classic Burgundy 853 • IR = .32

Evergreen 875 • IR = .27
